

NEXABOND 2500M WOOD ADHESIVE

INNOVATING ASSEMBLY

Nexabond™ 2500 wood glues offer the woodworking professional a way to revolutionize assembly and manufacturing of cabinetry and other millwork products due to eliminating the problems caused by water in traditional carpenters' glues.

With Nexabond™ adhesives, craftsmen can eliminate sandpaper loading, often the bane of traditional carpenters' glues. Reducing, or even eliminating clamping offers obvious cost saving advantages.

Nexabond™ 2500 wood glues contain no hazardous solvents, no VOCs, and are non-flammable. Because Nexabond™ adhesives allow significantly less adhesive to be used, waste costs drop dramatically.

BENEFITS

Using Nexabond™ 2500 wood glue offers the following benefits:

- Water free
- Achieves high strength quickly
- Reduces clamping time
- Bonds quickly without activator
- One component; no mixing required
- Consistent performance
- Stronger assemblies
- Higher impact resistance
- Glue, plane and stain all in one day
- Also works on MDF, Melamine, Particleboard, and many exotic woods
